

## Strip, tube and pipe, hoses and assemblies

**Q**uality Group's three main product divisions today are: stainless steel precision strip - cold rolling; stainless steel welded tubes and pipes; and stainless steel corrugated hoses and assemblies. Quality Foils (India) Pvt Ltd, which is an ISO

# How do you describe India's 'Quality Group'?

**With a legacy of more than three decades (35 years to be more precise), Quality Group has been redefining the Indian stainless steel industry with innovation in a wide range of products. The group has integrated its manufacturing capabilities into three major product divisions.**

9001:2008 certified organization, is the flagship entity of Quality Group, a producer of cold rolled stainless steel precision strip and coil in all grades from 0.20mm to 3.50mm thickness with a maximum width of 710mm, used mainly for the manufacture of stainless steel tube and pipe, utensils, cutlery, kitchen sinks, and stainless steel flexible hoses and automobile components. In its stainless steel flexible hose division, the company manufactures annular corrugated flexible hoses in the size range 1/4" (DN 6) to 8" (DN 250), and can offer these in the material grades 304/L, 321 and 316/L, with wire braiding of grade 304 done on 24, 36, 48 and 96 carriers braiding machines.

This product is mainly

used for applications such as high temperature and medium pressure usage in the hydraulic oil, hot water, steam and gas sectors, chemical resistant applications, exhaust systems, the steel, power, petrochemical, sugar, and automobile industries, and many other heavy engineering sectors.

### **Stainless steel pipes and tubes**

Quality Stainless Pvt Ltd is also ISO 9001:2008 certified from Lloyd's and PED 97/23/EC/AD Merkblatt W0/W2 certified from TÜV. It is a leading manufacturer of the highest quality stainless steel seamless and welded tubes and pipes conforming to Indian and international standards (ASTM, ASME, DIN, BS, IS, EN, JIS, ISO).

Products include instrumentation tubes, heat exchanger straight and U tubes, tubes and pipes for the general engineering and process industries, tubes for the automobile industry, and tubes for architectural and decorative applications.

### **Joint venture with Jindal Saw**

Quality Group recently entered into a joint venture with Jindal Saw Ltd (one of the largest pipe/tube producing companies in India) for the manufacture of stainless steel welded and seamless tubes and pipes. The new company, known as Jindal Quality Tubular Ltd (JQTL), offers the unique advantage of the experience of Quality Stainless in the field of stainless steel tubes and pipes and the administrative capability and global penetration of Jindal Saw Ltd.

Jindal Saw Ltd is a dominant market leader in the pipes and tubes business and its range of products includes seamless tubes, ductile iron pipes, and large diameter HSAW and LSAW pipes. The clientele of Jindal Saw includes major oil and gas companies, the water utility bod-

ies, and many other industries and enterprises. The size range is 1/2" NB up to 72" in welded stainless steel tubes and 6mm OD to 12" NB in seamless stainless steel tubes.

### **A wide range of products and markets**

To sum up, Quality Group deals in a wide range of stainless steel products and markets. Its Group companies' ability to meet the demanding requirements for high quality standards and faster turnaround times has gained its products favourable acceptance among leading OEM engineering companies for their critical applications.

### **Future plans**

The Group has a number of plans for the future, including the introduction of BA and 2B finish for precision strip, oscillating and bobbin wound strip, as well as a large diameter bellow production facility (1,000-4,000mm). There will also be a special focus on polished and ornamental tubing.
